

## New Yorkers For A Day

Prevalence of Boll Weevil in South Has Driven Cotton Planters to Devote Part of Their Acreage to Other Crops, and More Diversified Products Will Bring Prosperity.

By Roger Batchelder.

"Troubles are often blessings in disguise, and such, in my opinion, will be the boll weevil, which has caused so much havoc in the cotton districts of the South recently," prophesied H. H. Gordon, President of the Commercial Bank of Athens, Ga., who is at the Astor. "My reason for making this assertion," he went on, "is the fact that we are now turning our attention to raising wheat, oats and other grain, which we previously bought from the Northwest, and other Western food-stuffs as well. In the future we shall be relieved of the necessity of importation, for our cotton acreage will probably be curtailed for some time and we shall devote our land to other crops."

"The loss sustained in the cotton-growing section during the past two years will also bring about the co-operation of all growers to combat the boll weevil. It is a matter of statistics that those growers who followed the advice of our agricultural experts did not sustain the loss suffered by others. The attitude of business men is one of complete faith that the people will work out the problem. It may take several years, and it will require the support of the business men and the banks, but we will surmount the difficulties."

### THE "MOVIE" CRISIS.

"The moving picture business is going through a crisis unequalled in its history," asserted Dimitre Stephan, a scenario writer of Los Angeles, at the Claridge. "Fearing European competition and feeling that progress is hampered by censorship, many producers are not starting the new year with optimism. The big powers in the industry are willing to co-operate to keep up the high standard of pictures and they have no fear of censorship on that account, but the small producer, working on limited capital, sometimes thinks that he must approach the danger line of sex appeal to make his picture a success. As there is no 'censor' or nationality where brains and art are concerned, the work of European directors should be welcomed here. If they have something in advance of our efforts, we will benefit by it, and soon surpass their best."

### NEW YORK—CLEARING HOUSE OF PEOPLE.

At about noon yesterday a group of men left the Biltmore and stopped before a waiting limousine for a brief conversation. One of the group wore a straw hat and carried a bag of obviously brand new golf clubs. The rest of the men wore heavy fur coats, and in their wake were porters with snowshoes and similar articles allied to winter. They all came from the same city, it seemed, and had made their vacation purchases in New York. The man with the straw hat was on his way to Palm Beach; his friends were about to take the train for Canada and its winter sports.

### AUTOMOBILES THE THING NOW.

"Throughout the hotel lobbies one hears nothing but conversation about automobiles," remarked William Peterson, a San Francisco rubber dealer, at the Commodore. "With the coming of the New Year and in view of the approaching Automobile Show, dealers of all kinds of cars and allied accessories have come to New York to 'talk things over' and try and find what 1922 holds forth for them."

"In walking around the lobby today I heard snatches of conversation about the following topics: Roads, engine knock, the importation of cars, second-hand cars and just cars. Then there was the license tax question, which is very timely just now. It is agreed that the new New York

### Study your skin

Begin to use Resinol Soap and Ointment and watch results. These wholesome agents preserve good complexions and improve bad ones.

The Resinol treatment is ideal for baby's skin

—cure the germ, catch the cold. Resinol  
in 24 hours, too, by killing the germ. Resinol  
prevents other diseases from developing.  
—Cure for careful people. At all druggists.

country—street cars, taxicabs, subways—and every one is in a hurry to get somewhere to get something accomplished. Your New Year's Eve crowds were beyond the understanding of a foreigner. I never saw such masses of people on the streets. In Madrid there is generally a good sized crowd on the streets at midnight, but it could not compare with Broadway's throng. I got two blocks away from my hotel and was swept to the other side of the street and into the subway. It took me an hour to walk back home from 54th Street."

### FARTHEST FROM HOME.

The "New Yorker for a Day or Two" who is farthest from home today is J. F. Stoll, who is at the Commodore. His home town, Hongkong, is 10,500 miles from Broadway.

### COLD CELL FOR LANDLORD.

He gets 3 Days for Failing Properly to Heat Tenement.

Because Mariano Marsalini, agent for the three-story tenement at No. 662 Manada Street, Bronx, failed properly to heat the building on Dec. 25 and thereby caused three small children to suffer greatly, a testifier in Municipal Term Court yesterday, he was sentenced to prison for five days by Magistrate Cobb.

Health Inspector Hickey testified that when he visited the tenement the temperature of the rooms was 25 degrees. Marsalini said he had been unable to get enough coal. "There is no doubt in my mind that these children suffered greatly," said Magistrate Cobb, "and because of that, Marsalini, I sentence you to a cold cell for the next five days."
